

Preparing mixture:

Premix the required amount of Trigard® 75 WP with a small amount of water to form a slurry. Half fill the spray tank with clean water and pour the slurry through a sieve into the tank. Add more water to fill the tank up to the final volume.

Compatibility:

Trigard® 75 WP is compatible with most insecticides, acaricides and fungicides. The compatibility of Trigard® 75 WP with third party products may be affected by the formulation of the other products and / or the quality of the water used for dilution. Since Syngenta cannot be aware of the water quality, we cannot accept responsibility for poor results or crop damage. Test compatibility with the water and the product to be used in the mixture prior to application to ensure both physical compatibility and crop safety.

8.2 Exposure controls

- Engineering measures : Containment and/or segregation is the most reliable technical protection measure if exposure cannot be eliminated.
The extent of these protection measures depends on the actual risks in use.
If airborne dust is generated, use local exhaust ventilation controls.
Assess exposure and use any additional measures to keep airborne levels below any relevant exposure limit.
Where necessary, seek additional occupational hygiene advice.
- Protective measures : The use of technical measures should always have priority over the use of personal protective equipment.
When selecting personal protective equipment, seek appropriate professional advice.
Personal protective equipment should be certified to appropriate standards.
- Respiratory protection : No personal respiratory protective equipment normally required.
A particulate filter respirator may be necessary until effective technical measures are installed.
- Hand protection : Chemical resistant gloves are not usually required.
Select gloves based on the physical job requirements.
- Eye protection : Eye protection is not usually required.
Follow any site specific eye protection policies.
- Skin and body protection : No special protective equipment required.
Select skin and body protection based on the physical job requirements.
